SREYASMON SHAJI

System Analyst | Requirements Analyst | Mainframe Expert

Stockholm, Sweden | +46 73 969 02 58 | sreyasmon87@gmail.com | linkedin.com/in/sreyasmon-shaji | sreyasmon-shaji.github.io

PROFILE

System Analyst and mainframe specialist with 12+ years in IT, mostly in US healthcare and insurance systems. 9+ years hands-on with COBOL, DB2, IMS DB and JCL on z/OS, and 2+ years as System Analyst: turning business needs into clear requirements, running impact and scope analysis, and bridging business stakeholders and technical teams in Agile delivery. I validate requirements against how the legacy code actually behaves, so what gets built is what the business needs. Hands-on across almost the complete healthcare claim lifecycle, from EDI mapping to the EOB. Supported 10+ healthcare applications and 100+ production releases, and resolved 20+ production incidents. Interviewed 25+ mainframe candidates and mentored junior engineers. Microsoft Certified: Azure Administrator Associate. Based in Stockholm and looking for roles in Sweden.

KEY SKILLS

Analysis & requirements: Requirements gathering and analysis, process flows, impact and scope analysis, business-rule analysis, stakeholder management, UAT support, post-release validation, root-cause analysis, test data management
Mainframe: COBOL, JCL, REXX, DB2, IMS DB, IMS DC / IMS TM, VSAM, GDG, IBM utilities, z/OS, ChangeMan, CA Endevor
Integration & data: SOA, APIs, eHub integration layer, EDI mapping, batch processing, JSON
Delivery: SDLC, Waterfall (about 7 years), Agile / Scrum, PI Planning, Jira, Confluence, release management
Cloud & tools: Microsoft Azure (AZ-104), Visual Studio. Classroom training: JavaScript, Python, MySQL, MongoDB
Domain: US healthcare claims and benefits: EDI, edit and load, pricing, adjudication, claim finalization, EOB

WORK EXPERIENCE

Career break: upskilling and relocation to Sweden Jan 2025 – Present
Stockholm, Sweden

- Earned Microsoft Certified: Azure Administrator Associate (AZ-104) after Azure training; valid until 25 Apr 2027.
- Relocated to Stockholm and started learning Swedish.

Lead II – Software Engineering (System Analyst role) Sep 2022 – Jan 2025
UST, Kochi, India
Client: Elevance Health (US healthcare) · Agile

- Owned requirements, impact and scope analysis for healthcare benefits systems, validating requirements directly against COBOL, IMS DB and DB2 logic, and supported delivery through UAT and post-release validation.
- Benefits 24/7: gathered requirements with the client and managed stakeholders for a provider-facing benefits verification capability (natural-language search in the provider portal). Found and fixed logic gaps through mainframe code analysis, correcting 50+ incorrect benefit lookup results, and delivered on schedule across Agile sprints (team of 30+).
- Claims Modernization: analysed COBOL programs, copybooks and DB2 structures and authored their logic as natural-language specifications in Visual Studio, converted to Java by an automated toolchain; took part in client interactions and requirements gathering.
- Bridged business and technical teams across Agile delivery: PI Planning, sprint ceremonies, release coordination, development and testing collaboration, production implementation (Jira, Confluence).

Senior Software Developer Jun 2019 – Jun 2022

Legato Health Technologies (now Carelon Global Solutions), Bengaluru, India

Client: Elevance Health (US healthcare) · Agile

- Mainframe production support: resolved production defects and performed root-cause analysis on mainframe healthcare applications.
- eHub / SOA integration (team of 20+): supported the claims and membership data layer feeding the Provider and Member portals; developed JCL for scheduled and ad-hoc batch loads. Fixed recurring causes of failed batch jobs and ran eligible jobs in parallel, reducing reruns and data load time.
- Test Data Management (1+ year): provisioned, extracted and masked healthcare test data from DB2 and IMS DB for lower environments across 100+ tickets; built JCL and REXX tools to automate test data refresh.

Senior Software Developer Nov 2012 – May 2019

UST, Kochi, India

Client: WellPoint, now Elevance Health (US healthcare) · Waterfall (SDLC)

- Image Rewrite (Claims Adjudication Process): built, largely independently, the core of a new claims adjudication system: COBOL modules with DB2, IMS DB, VSAM, copybooks and JCL; online adjudication screens (Detail and Summary views) with IMS DC / IMS TM; and the automated adjudication batch jobs.
- Received formal client recognition and a performance reward for quarterly performance on this project.
- Worked across almost the complete claim lifecycle: EDI mapping, edit and load, pricing, adjudication, claim finalization and EOB creation.
- Acted as project lead for a period, leading delivery as business–technical liaison; mentored junior engineers. Used IBM utilities and GDGs for batch file processing.

EDUCATION

Master of Computer Applications (MCA), Marian College, Kuttikkanam, Kerala, India Sep 2008 – May 2011

Bachelor of Computer Applications (BCA), Marian College, Kuttikkanam, Kerala, India Aug 2005 – May 2008

CERTIFICATIONS AND TRAINING

Microsoft Certified: Azure Administrator Associate (AZ-104) – Valid 24 Apr 2026 – 25 Apr 2027. Azure training at Emigo, Palarivattom, Kochi, India

Classroom training – JavaScript, Python, MySQL, MongoDB (training only)

LANGUAGES

English – Professional working proficiency **Swedish** – Beginner, currently learning
